

# TC201 Dykes and Levees Workshop on Geotechnical Aspects of Dykes and Levees

---

## Workshop on Geotechnical Aspects of Dykes and Levees and Shore Protection

Reykjavik, 1 September 2019

13:00-13:05      **Introduction & welcome**

Invited Theme Lectures:

13:05-13:45      **Large scale experiments with a coarse sand barrier as part of a multi-scale investigation of a novel remediation technique against backward erosion piping.**

*Ulrich Förster*

13:45-14:30      **Levees breaching scenarios and the different deterioration/damage mechanisms; link with failure modes analysis and risk analysis.**

*Rémy Tourment*

14:30-15:15      **The impact of the Eemdijk full-scale field test programme**

*Joost Bredeveld*

15:15-16:00      **Internal erosion of earth flood embankments**

Jonathan Black

**ISSMGE TC201 Committee Meeting**
